

Academic Progress – Following are charts that displays the growth of students during the time spent at the North Country Charter Academy by site. The numbers (i.e. – 7.1 would mean grade 7. The point 1 being early in the year) represent the grade level. So the **entry level** number is an average of all students as they entered the Academy and the **exit level** number is an average of all students when they left the Academy. The **growth** is the amount of grade level growth made in the subject area listed in the top of that column.
